Summary

Drawing on front-end coding experience, in-depth knowledge of Javascript and React concepts, I seek to outperform and build on innovation, utilizing both creativity and programming expertise. Responsive web-based applications that delight users and operate efficiently in large-scale environments is my jam.

Experience

Front-end Web Developer

Sierra Club

Mar 2015 - Present (6 years 3 months +)

Managed Sierra Club's addup.org web property which included creating new features, and modifying existing features. Tech was mostly vanilla javascript and React. Liaised with third party vendor that built the site. Integrated customized features using Salesforce apis for data management. Conducted various A/B testing using Optimizely testing suite.

Senior Front-end Developer

GE Software

Oct 2013 - Nov 2014 (1 year 2 months)

Developed single page application modules in angular and plain old javascript. Provided team expertise in front-end html/css semantics and responsive design fundamentals. Also had projects that used Bootstrap, HTML5 Canvas, and High Charts. Used Jasmine testing framework and Karma to perform js unit testing.

Senior Front-end Developer

Expedia Group

Jun 2011 - Oct 2013 (2 years 5 months)

Collaborated with back-end developers, and UX/designers to provide the front-end development of HTML, Javascript, and JSTL for new and updated application features for both desktop and mobile sites. Proposed and architected a mobile-first responsive HTML5 and CSS3 methodology with a focus on website performance optimization.

Lead Front-end Developer

1up.com, Hearst Media

Aug 2006 - Apr 2011 (4 years 9 months)

Hand-coding of HTML, Javascript and JSTL within the JSP layer using Eclipse with CVS. Updated legacy js with jQuery framework. Managed a small production team of Associate Web Producers to deliver daily website content, updates, landing pages, promotions, and emails. Converted the sites'

hundreds of table-based HTML layout JSPs to more modular design pattern using valid semantic table-less xhtml and valid css.

Website Architect

MarkMonitor/Alldomains.com;

Feb 2000 - Apr 2006 (6 years 3 months)

Responsible for front-end development of www.markmonitor, alldomains.com and allwhois.com as well as the internal corporate intranet. Primary duties included HTML, and programming in Perl & Javascript, email campaigns, and marketing deliverables. Liaison between Marketing and Engineering. I began this position with Alldomains.com which was acquired by MarkMonitor in 2003.

Education

University of California, Berkeley

Certificate, Full Stack Web Development

Mar 2021 - Jun 2021

Skills

Online Advertising • HTML • CSS • MySQL • jQuery • jQuery UI • JavaScript • JSP • Perl • HTML5
